SITUATION SUMMARY

Flotopia Event, Isla Vista, Santa Barbara County

- Santa Barbara County will be closing Isla Vista Beach on Saturday 04/02/2016 until Sunday 04/03/2016 due to the “Flotopia” event.
- Per the Santa Barbara County and Community Services Department:
 - Following the Floatopia event of 2009, the beaches at Isla Vista were left strewn with trash and debris.
 - This large scale event with thousands of participants had no provision for the health and well being of the public, including no facilities for human sanitation or refuse collection.
 - The County of Santa Barbara, therefore took action to close the Isla Vista beaches for a similar event in 2010, 2011, 2012, 2013, 2014 and 2015.
 - The closure is to protect public health and safety.
 - Due to the implementation of beach closures, the party has moved to the streets of Isla Vista causing the name of the event to change to Deltopia.
 - UCSB has scheduled activities throughout the next couple days for students in lieu of participating in the Deltopia event.

Weather of Concern

Northern California

- Warm temperatures are expected this weekend with mainly dry weather across Northern California.
- A few showers and thunderstorms will be possible today along the northern Coastal Range, and again Sunday.

Southern California

- Mostly sunny this weekend with early morning low clouds and fog near the coast.
- Daytime high temperatures will average a few degrees above normal today.

Cal EOC Incident – 2014 Drought

SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA

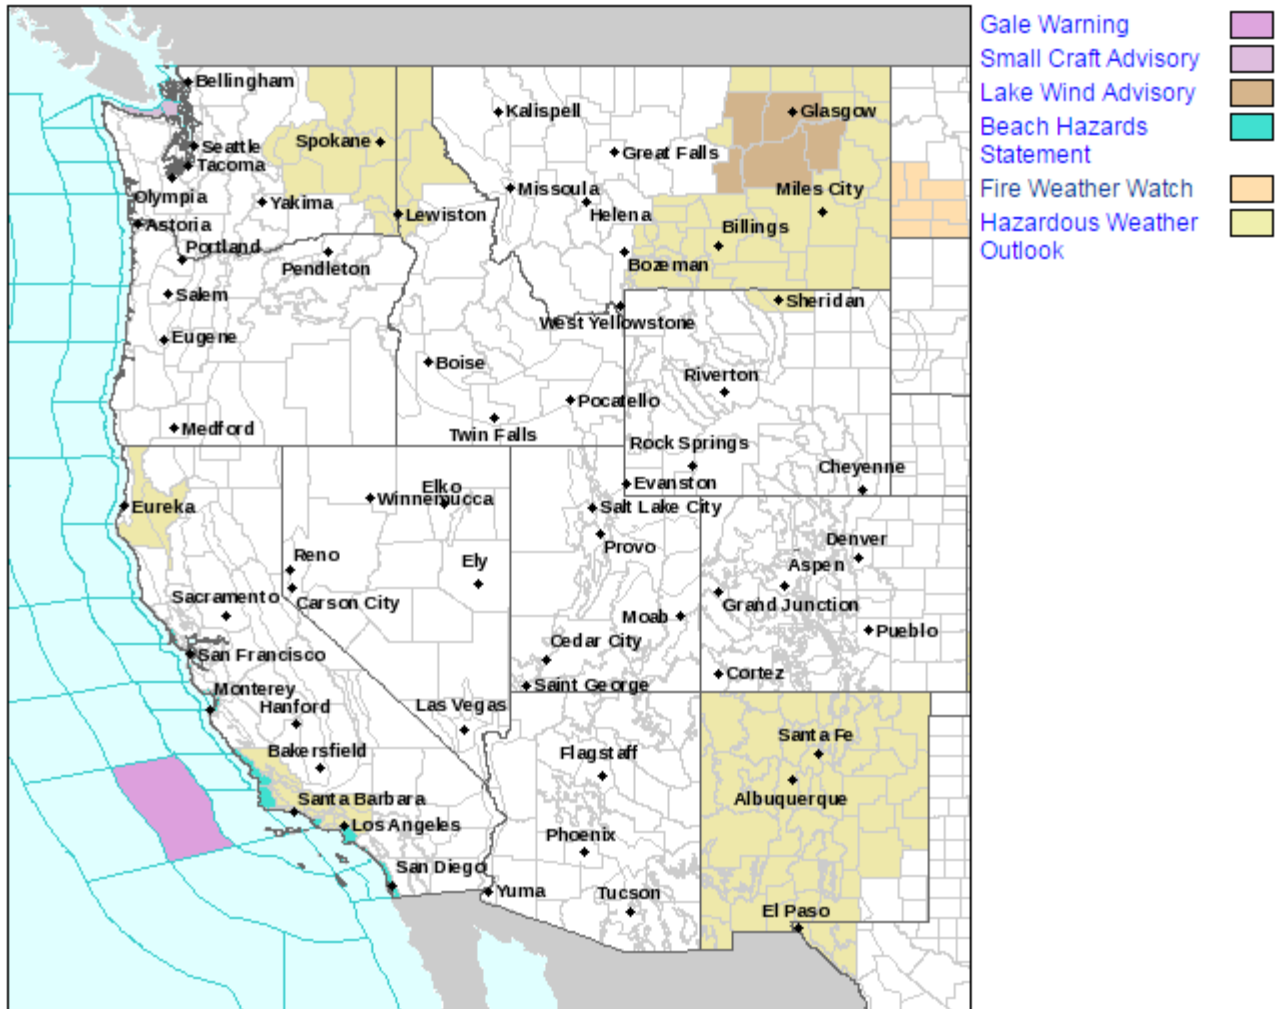

A high pressure ridge over Northern California will produce warm and dry weather today. Temperatures will reach about 10 degrees above normal. Late today the high will move east and a weak Pacific frontal system will approach the coast, leading to a gradual increase in southerly winds. A few cumulus clouds will develop over the higher terrain this afternoon. This trend will continue on today, and a few rain showers are possible late in the day over the mountains of far Northern California. A stronger frontal system will approach the coast Sunday afternoon and cause more clouds and wind and scattered mountain showers across Northern California. Moderate to brief heavy rainfall will accompany the front north of a line from Ukiah to Red Bluff to Susanville as it passes through Sunday night and early Monday. The remainder of the region will be partly to mostly cloudy, dry and breezy. Rainfall totals will be 0.25-1.00 inches over the higher terrain in far Northwest California and a trace to a tenth elsewhere where rain falls. Peak gusts along and ahead of the front will be 35-40 mph. High pressure will build over Northern California area Monday night through Wednesday. A North to Northeast downslope surface wind pattern will develop Monday night through early Wednesday. Warm and dry conditions across the region will be enhanced by these winds from the western Sierra slopes to the coast. Peak gusts will be 25-35 mph. Maximum afternoon temperatures will reach 10-15 degrees above normal. The high will move east and a southerly flow will develop on Thursday. This pattern may lead to rain chances beginning late Thursday.

SOUTHERN CALIFORNIA

A ridge of high pressure over California will continue to bring warming to Southern California through this weekend. Maximum temperatures will be in the upper 50s and 60s across the mountains and 70s to low 80s in the valleys today and then in the 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys this weekend. Minimum humidity will be mainly between 20% and 40% through this weekend, but drop into the teens across most desert locations. A Pacific trough moving inland well to the north will bring around 5 degrees of cooling to the area Monday. Behind the trough, a strong ridge of high pressure will build into California from the Pacific causing temperatures to become 10 to 20 degrees above normal and humidity to drop into the single digits and teens Tuesday and Wednesday. Northeast to east winds of 20 to 30 mph with gusts to 50 mph will surface across the mountains and below the canyons and passes of Southern California Tuesday afternoon through Wednesday afternoon. Temperatures will cool significantly and there will be a chance of light showers across the region late next week as an area of low pressure approaches California from the south.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought
